Sample

- 3 Across
the branch of mathematics that deals with the relations between the sides and angles of plane or spherical triangles, and the calculations based on them
- 4 utilizing letters and other symbols to represent specific sets of numbers
- 5 the branch of mathematics that deals with the deduction of the properties
- 6 a method of calculation, esp. one of several highly systematic methods of treating problems by a special system of algebraic notations, as differential or integral calculus.
- 7 utilizing letters and other symbols to represent specific sets of numbers

- Down
- 1 the branch of mathematics that deals with general statements of relations pertaining to the mathematical prerequisites for the study of calculus, as algebra, analytical geometry, and trigonometry
- 2 pertaining to the mathematical prerequisites for the study of calculus, as algebra, analytical geometry, and trigonometry
